- TECADE INTERNATIONAL: GLASGOW
- TECADE NATIONAL: TECADE YARD
- A GREAT HUMAN TEAM

NEWSLETTER 1

*TECADE, S.A. is a company whose head office is in Los Molares, Seville (Spain). It was set up in 1986 with the aim of becoming a world leader in the field of large special structures and, in the last years, in the offshore sector.*

*Our main scoop is based on:  
STRUCTURES and OFFSHORE: RENEWABLE  
energy (Eolic energy) and OIL&GAS industry.*

## TECADE INTERNATIONAL

### GLASGOW

Tecade has been assigned the improvements on M8, M73 y M74 in Glasgow.

We have designated a multiskilled staff for the improvements works on the highways M-8, M-73 and M-74 in Glasgow-Scotland, U.K. It is for the Procurement and Construction project where Tecade is taking part. We sent 21x steel beams measuring up to 35 meters length and weighting up to 95 tonnes.

The total scoop of it is 4000 Tn steel. Loading operations of the cargoes on board of a coastergearless vessel took place in the Spanish port of Seville last august. All the steel beams and rest of minor equipment were loaded on board of the vessel in just one day.

Tecade is becoming a perfect company to be in charge of this kind of project. Its facilities and competitive human team allows us to adapt ourselves to any project or situation.

Tecade has the **NHSS** certificate of approval, **ISO 9001:2008**. It certifies the quality management system that is applicable to: fabrication, welding and erection of steelwork for steel structures in transportation infrastructure assets. That kind of certification sets us apart from other companies on the sector.

Tecade is becoming a reference for the large structures construction and we are currently blazing new trails through a continuous process of internationalization.

We want to break down any possibility of a barrier when collaborating or working with companies in the neighbouring country, so we are always adapting ourselves to the sector requirements anywhere.

We have just opened a new corporate affiliate at United Kingdom **TECADE LIMITED**, according to the company main aim currently: the **INTERNATIONAL MARKET**.

It is an objective that forces Tecade efforts to change and to implement major changes in their business totally aligned with their strategic objectives.

## TECADE NATIONAL

### TECADE, looking towards the future...

Tecade has the project to change the shipyard (Port of Seville) into a new place with the optimal conditions to work on structures for the Offshore market and any national or international project.

Remodeling the shipyard and having access to all the facilities we will have the capacity to deal with any project around the world and any kind of work for the offshore sector.

Thanks to our progress and experience in the manufacturing of big steel structures Tecade has become a global leader. Due to our expertise, we are becoming a reference company in the sector. Our wide and proven experience in the manufacturing of steel metal structures allows us compete in the offshore sector with complete guarantee, expectations and possibilities to increase our production day a day.

Tecade plans to increase its production capacity with the shipyard transformation project. Due early in 2016, serial production capabilities at Tecade will be targeted for production of big steel structures for

the offshore market (we have just been assigned the construction of the main section of the New Bridge for the St Lawrence (Montreal- Canada))

To produce on civil engineering sector we need a day a day time allotted, investments in new technologies, capabilities, production facilities and talent of employees. Operating in these dynamic markets requires continuous improvement, development and flexibility at all times in order to build steel solutions that stand the time.

That investment has made Tecade able to gain a strong foothold in the market place. We monitoring our procedures and our team to improve and to increase to all levels.

## TECADE, a great human team

Our success is the result of the effort and dynamism of people with great abilities and innovative spirit who, day-to-day, face new projects by combining youth, experience and professionalism of the team to which they belong.

TECADE is well known because of its national and international level interventions and we have achieved a high standing on the latest years. That is the consequence of dedication and the evidence that a good teamwork fulfills greatest results. A committed team, the investment on improvements, the compliance with the law, our ethical behavior and the human and environmental values are the basis of our way of work.

We work hard on resources optimization. It's not enough having economic results, we want to go further and we consider the impact of our actions around us, especially on our employees, the society and the environment.

Are you looking for an innovative company that always works towards the future?  
Tecade is your option!

**Thank you for trusting our company!!**
