

## SUMMARY:

- Tecade obtains AISC certification to operate in the United States
- Tecade takes part in VII International Congress on Structures
- Industry recognition
- Champlain bridge
- New cylinder

## OPENING DOORS - BROADENING HORIZONS

### Tecade obtains AISC certification to operate in the United States

Tecade has become one of the few companies in Europe to be certificated by AISC (The American Institute of Steel Construction). This new certificate makes us the only major steel construction company that has achieved this level of excellence.

The American Institute of Steel Construction (AISC) is a non-partisan, not-for-profit technical institute and trade association to serve the structural steel design community and construction industry in the United States. AISC's mission is to make structural steel the material of choice by being the leader in structural-steel-related technical and market-building activities, including: specification and code development, research, education, technical assistance, quality certification, standardization, and market development.

AISC has a long tradition of service to the steel construction industry providing timely and reliable information.

As part of AISC's mission, we emphasize:

- Increasing the structural steel industry's share of the construction market
- Unifying the industry with a common purpose
- Increasing the structural steel industry's share of the construction market
- Supporting and improving the ability of the structural steel industry to be both innovative and competitive in a worldwide construction market.

### Tecade takes part in VII International Congress on Structures

The VII International Congress on Structures held by ACHE took place last June at A Coruña, Spain. Tecade participated in coordination with Pontem Engineering, our engineering company, our associated. It was a wonderful opportunity to meet new companies in the civil engineering field and make new contacts as well as enjoy the interesting presentations from the different speakers.

## TECADE obtains new and exciting awards and recognition

### INDUSTRY PRIZE

TECADE, S.A. received the industry prize awarded by Cámara de Comercio de Sevilla during the “Noche de la economía y las empresas” event held last night. Congratulations to all the winners: Aciturri, UNYQ SYSTEMS LIMITED, Grupo Ybarra, Wellness Telecom, sevilla tour, Grupo LAR and Elías Hernández Barrera (Hisparroz).

### New Champlain Bridge Project

Construction of the New Champlain Bridge represents one of North America's biggest worksites. Conceived in keeping with sustainable development practices, the project will lead the way in modern engineering and urban integration. Our involvement with the project continues to progress satisfactorily.

Both the construction of the different main structures in the bridge, the shipment from Seville to Canada and the placement on site are having good results.

## A New Cylinder has been acquired

The workload coming from offshore industry undertaken by TECADE, S.A. is requiring the need for expanding the capacity of sheet bending.

Tecade strives to continually improve and renew its services which has lead it to incorporate a new cylinder at its facilities at the Port of Seville, TECADE YARD.

This new acquisition has a higher rolling capacity: **up to 222mm thickness and it can reach up to 4 meters ferrule long**; benefiting us to improve our capacities and the possibility to cope with a challenging future.
